

Do You Have Medicines You No Longer Need?

Help Protect Our Local Rivers and Wildlife

Pharmaceuticals entering the river can cause significant problems for aquatic life.

Safe disposal of medicine helps to protect our rivers.

All types of medicine can be returned to a pharmacy for safe disposal. Both prescribed and over the counter creams, tablets, inhalers, liquids and powders can be returned.

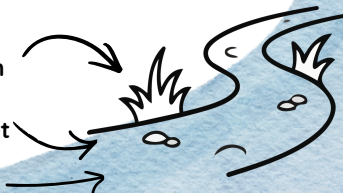

medicines that are:

 poured down the drain

 flushed down the toilet

 or put into household rubbish...

... can make their way to the river and accumulate, causing harm to wildlife.

 pet medicines can be returned to a vet

 Please remove any names and addresses before returning
